

# Pwn Phone

## Hardware Specs:

CPU: Quad-core Qualcomm Snapdragon 800, 2.3GHz

GPU: Adreno 330, 450MHz

Memory: 2GB RAM

Internal storage: 16GB

Display: 4.95" 1920x1080 display (445 ppi)

Battery: 2300 mAh

Cameras: 1.3MP front-facing, 8MP rear

Onboard wireless: Dual-band 802.11a/b/g/n/ac Wi-Fi, Bluetooth 4.0

External wireless: 802.11b/g/n Wi-Fi and Bluetooth adapters w/ packet injection

Sensors: GPS, Gyroscope, Accelerometer, Compass, Proximity/Ambient Light, Pressure, Hall

Onboard cellular: 2G/3G/4G/LTE

GSM: 850/900/1800/1900 MHz

HSDPA 800 / 850 / 900 / 1700 / 1900 / 2100

CDMA: 800 / 1900 (Bands: 0/1/10)

WCDMA: 1/2/4/5/6/8/19

LTE: 700 / 800 / 850 / 1700 / 1900 / 2100 / 2600 (Bands: 1/2/4/5/17/19/25/26/41) - North America

LTE: 800 / 850 / 900 / 1800 / 2100 / 2600 (Bands: 1/3/5/7/8/20) - International

Dimensions: 69.17 x 137.84 x 8.59 mm

Weight: 4.59 ounces (130g)

**NAICS:** 511210, 541511, 334111, 238210, 561621, 334119, 334210, 423430, 928110, 541990

**DUNS:** 011160006

**PSC:** D307, D308, D310, D399 FSC: 730

**CAGE:** 6HBR1

The next generation Pwn Phone is a sleek LG Nexus 5 phone that doubles as a powerful penetration-testing device, making it incredibly easy to evaluate wired, wireless and Bluetooth networks and devices.

The Pwn Phone's custom Android front end and 'one-click' pentesting applications and software updates make it the ideal choice for pentesters on the road or conducting a walk through.

## Core Features

- Fits in your pocket! Our most portable pentesting device yet
- Part of Pwnie's device threat detection platform
- More than 100 of the most popular open source testing tools
- High performance CPU/GPU, HD display, powerful battery
- External high-gain 802.11b/g/n wireless supporting packet injection & monitor mode
- External high-gain Bluetooth supporting packet injection (up to 1000')
- External USB-Ethernet adapter for wired network pentesting
- Custom Android front-end with One-Touch Pentesting apps, including Evil AP, Strings Watch, Full-Packet Capture, Bluetooth Scan, & SSL Strip
- Custom Kali Linux back-end with comprehensive pentesting suite, including Metasploit, SET, Kismet, Aircrack-NG, SSLstrip, Ettercap-NG, Bluelog, Wifite, Reaver, MDK3, & FreeRADIUS-WPE
- One-Touch, in-product updates keep your toolkit up to date with the click of a button
- 6 different covert channels to tunnel through application-aware firewalls & IPS
- Unlocked 4G/LTE GSM (SIM card not included)
- Includes USB OTG cable (for USB host-mode)

*"As someone who pentests all the time, having something versatile that I can slip in my pocket and use at a moment's notice is invaluable to me. The new Pwn Phone is a must-have for pentesters."*
